Solid Waste Disclosure Form

Dear Customer:

The Waste Management Act, as amended in 1993, requires that a person who collects construction debris, industrial waste, or mixed municipal solid waste for transportation to a waste facility shall disclose annually to each waste generator from whom waste is collected the name, location, type of, and the number of the permit issued by the Minnesota Pollution Control Agency, or its counterpart in another state, for the processing or disposal facility or facilities at which the waste will be deposited. The collector shall note both the primary facility at which the collector most often deposits waste and any alternative facilities regularly used by the collector. Pursuant to Minnesota Statute 115A.9302, Randy's Environmental Services hereby discloses that mixed municipal solid waste collected will be delivered to one of the following facilities during the time period January through December. If an additional facility becomes either a primary facility or an alternate facility during this period, the hauler is required to provide you with updated information within 30 days. In addition, the Minnesota Legislature requires Minnesota waste haulers make the following disclosure to their customers:

“You may be responsible for any liability that results from contamination at the facility where your waste has been deposited. Minnesota believes that its waste management system provides substantially more financial and environmental protection than depositing waste in landfills in other states. Managing your waste in Minnesota may minimize your potential liability.”
